

V-MOVE® XL & XL+

The V-move® XL has been specially developed to move waste and recycling bins, custom recycling trailers, industrial equipment, boat trailers and horse trailers up to 3,000 or 5,000 kg, depending on model. The XL+ moves up to 8,000kg. The special drive and tires make it possible to use the machine on both hard and unpaved terrain.

Never push or pull heavy loads again. The V-move® XL works on battery all day long and after 5 hours of charging the machine can be used again. Option for fast-charge Lithium batteries. The V-move® XL comes standard with maintenance-free AGM batteries, external battery charger, speed control and battery indicator. In addition, various options are available.

| CHARGER | UL & CSA APPROVED |

Note: motor, drive-line, controller, batteries and charger are made in the USA. Specifications subject to change at any time. Picture of units may have option equipment.

FOLDING HANDLE

The V-move® is easy to operate with the optional folding ergonomic handle. Standard features are a horn, ignition lock, battery indicator and speed control.

WHEELS/TIRES

Various tires are available, such as pneumatic tires (standard), solid tires, non-marking tires, outdoor all-season tread tires and snow tires.

HITCHES & FLASHING LIGHT

The optional supplied ball and pin coupling are interchangeable. Many other tow hitches are available. Flashing light on pole option on center post instead of center hitch option.

WEIGHT-BEARING HITCH

The center coupling has been specially designed to be a weight-bearing hitch up to 200 kg for the XL or up to 500 kg with the XL+. Optionally lifts and lowers from the handle controls.

DOUBLE FRONT WHEEL

The optional twin-wheel swivel air or solid wheel provides extra load-bearing capacity. Optional in air, solid caster or solid rubber. Wheel guards are available.

HITCH & OTHER OPTIONS

This optional hydraulic 2-stage clutch is ideal for both single and tandem axles. Options for anti-wheely kit, fenders, explosion proofing, cloud based reporting, chargers and more

ADJUSTABLE STEERING

One optional steering arm can be positioned both to the left and right at an angle of 45°. This allows the user to look past the trailer or bin while moving.

ADDED WEIGHT PLATES

V-Move optional weight plates top, bottom, side and front are available to give added traction to pull heavy loads or in snow or on slopes.

AUTO LIFT HITCH

With the optional hydraulic coupling both single and tandem axles can be easily connected.

We have more options than listed!
