

## V-MOVE® XL+ Cart Mover

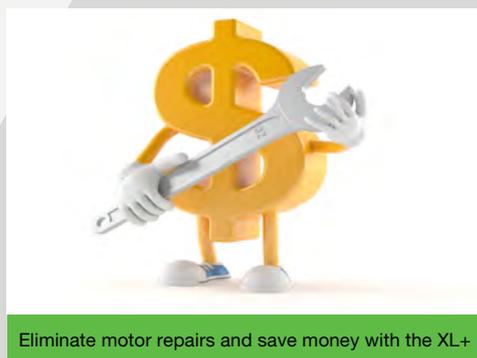

The V-Move® XL+ cart mover has been specially designed to move shopping carts in all weather conditions and up slopes. It has a wireless remote control so you can operate the pusher from the front of the line. The XL+ moves up to 8,000 kg or 17,638 lbs. However, we custom program the tug so the power and speed is reduced for less overall risk and longer equipment life. You can use the XL+ to move waste bins to maximize usefulness of your tug.

The V-Move XL+ uses an AC motor, which is superior to the DC motor found in most other tugs. You will substantially reduce repairs and repairs costs as you won't have to replace brushes or commutators with the XL+, resulting in reduced downtime. We use Lithium batteries so the V-Move® XL can be partially or fully charged mid-day, or when needed, much quicker than with conventional batteries.

### Reduce Repair Costs

### Increase Productivity

### Reduce Downtime

Eliminate motor repairs and save money with the XL+

Push more carts up-hill vs other cart pushers

The AC motor design means less downtime

## V-Move® XL+

VOLTAGE/WATTAGE	1.7 kw with boost to 4.6 HP
DRIVELINE	AC (brushless)
CAPACITY ON FLAT SURFACE	8,000 KG/17,600 lbs

2-year limited warranty\*

### FOLDING HANDLE

The V-Move® comes with a tilting ergonomic handle that naturally stands upright.

Standard features are a horn, flashing light, ignition lock, battery indicator and speed control.

### WHEELS/TIRES

Various tires are available, such as pneumatic all-season tread tires (standard), solid tires, non-marking tires and snow tires.

### OPTIONAL HITCHES

We can add optional hitches, including weight-bearing or hydraulic hitches that allow you to use your cart pusher to push or pull waste and recycling bins. This doubles the usefulness of your investment.

### WIRELESS REMOTE

Standard, is a wireless remote control that has all the operations of the tug in your hand. We include a long bungee cord to keep all the carts together while decelerating and stopping.

### CART ATTACHMENT

Every cart pusher comes with a custom sized cart attachment that is designed for your particular carts or a universal one if you have multiple sized carts.

### OPTIONAL WEIGHT

Optional weight plates for the XL+ Cart Pusher top, bottom, side and front are available to give better traction in the snow and on slopes.
